Today we went by underground to the British Museum. This building is Neoclassic and it's one of the best museums of the world, because it has different cultures.

The Egyptian part was the first part of the museum. The Egyptian's monuments had many details.

In the Greek part, we saw sculptures with a lot of details, and their faces express their feelings. The Roman part was very similar to the Greek part but with more evolution in the sculptures. Next, we saw the Medieval period part and the daily life of this period.

Today was a very hard day. I'm going to explain why: we woke up early and we took the bus to go to Seven Sisters.

This one is a spectacular natural area, it's complicated to imagine how it is, because it's very big and amazing. The weather was very bad, because it was rainy and windy.

When we finished the visit, we had lunch. Later, we took the bus and we came back to the hotel.

I had a great time!
